

Supporting complex renewable energy operations worldwide

At ALLSET Industries, we're proud to be the dependable force behind some of the world's most demanding industries.

ALLSET
INDUSTRIES

Renewable energy services we offer

From offshore wind to solar power, our engineers, technicians, and project specialists deliver reliable, hands-on expertise at every stage – from design and installation to maintenance and optimisation. Wherever your renewable projects take you, we're ALLSET to keep them running.

Global support, delivered fast

Our experienced teams respond quickly around the world to support renewable energy projects with reliable onshore and offshore service, ensuring smooth operations and lasting performance.

Precision-built electrical systems

From switchboards to custom control panels, we design and build robust solutions tailored to the exact demands of offshore wind and energy infrastructure.

Specialist equipment design

We engineer construction tools, lifting frames, and cable interfaces that integrate seamlessly into your system architecture, saving time and reducing risk offshore.

Efficient site set-up & installations

Our multidisciplinary teams manage full installation campaigns, from temporary power to final handover, with an emphasis on planning, safety, and uptime.

Smart anti-fouling innovation

We develop and implement sustainable anti-fouling technologies that protect offshore foundations, enhance lifespan, and reduce maintenance cycles.

Solar off-grid solutions

We design and deliver reliable solar power systems for remote and off-grid operations, providing consistent, sustainable energy where it's needed most. Our tailored solutions enhance independence, reduce fuel reliance, and ensure continuous performance in any environment.

OEM services

We supply certified lifting equipment and engineered lifting solutions tailored to industry needs. Through our Lift Management System (LMS), we ensure every operation meets the highest standards of safety, compliance, and performance, onshore and offshore.

Supervision and project management

Led by experienced specialists, we ensure renewable energy projects are delivered safely, efficiently, and to the highest standard, onshore and offshore.

Worldwide operations

We bring global insight and local understanding to every challenge, delivering dependable technical expertise with the speed and responsiveness you need to stay ahead.
